Lin Jiang, Angelica Rentsch, Alberto de la Fuente, Jos- Ignacio Ayestar-n, Sebasti-n Alberti, Nuria Borrell, Antonio Oliver, Eladio Oliver, Yair of the Infectious Diseases Society of America, Andres Roijes of Spain, Antonio OliverW. Li and Laura Garci are the authors of the following three major reviews:

Nature of the Large E.coli Outbreak in 2010 , Nature, September 4, 2011 <http://dx.doi.org/10.1038/n...>

Gene-Environment Factors Behind a Viral Outbreak in the US Health Service Pathogens and Disease Conferences, Strategic National Bio- and Agro-security Initiative, Washington, DC, December 12-13, 2011 <http://dx.doi.org/10.1371/n...>

Analysis of the Gene-Environment for an Expanded E.coli Infection Risk Profile, 2012, PLoS Neglected Tropical Diseases , Vol. 1(11) <http://dx.doi.org/10.1371/j...>

With these high profile publications our team will collect additional data on DNA and genotype isolates from the outbreak and perform epidemiological and biostatistical analyses to develop a sustainable E.coli prevention and control strategy.
